PAUL OZIOKO

Computer Science Teacher

Location : Thailand | +66931066602 | oziokopaulc@yahoo.com

Computer Science and Mathematics teacher with UK QTS, teaching IGCSE and IBDP. Experienced in practical computing, including coding, website design, and database development, VEX Robotics, Machine Learning and AI. Uses clear, structured teaching to support students of different abilities and focuses on steady progress and strong outcomes. Comfortable working in busy school environments and maintaining high standards in the classroom.

SKILLS OVERVIEW

- Mathematics Teaching
- Computer Science
- Curriculum Development
- Lesson Planning
- Python programming language
- Database Design
- Java programming language
- C++ programming language
- HTML, JavaScript, CSS, PHP & MYSQL
- VEX Robotics
- Inquiry-based learning
- Results & Target driven
- Data Analysis
- Syllabus/Subject Knowledge
- Topic-Based Learning
- Performance Improvement

CAREER SUMMARY

Garden International School Rayong, Thailand | Aug 2023– Present
IGCSE/IB Mathematics and Computer Science Teacher

Responsibilities

- Teach Mathematics and Computer Science across IGCSE and IBDP, designing structured lessons and activities that have contributed to a measurable increase in student attainment and engagement in Mathematics (over 20%).
- Plan and implement schemes of work aligned with IGCSE and IBDP specifications to ensure clear progression and reliable curriculum coverage.
- Use the PRIMM approach when teaching programming, helping students with different learning needs develop strong logical thinking and confidence in Python and Java.
- Support and mentor students during coding projects and coursework, helping them improve problem-solving and program design skills.
- Supported a student who achieved a Gold Award in the 2024 UK Junior Mathematics Competition.
- Assess, track, and report student progress in line with IGCSE and IBDP assessment requirements while maintaining a strong focus on student wellbeing and classroom conduct.
- Connect theory to practice by introducing real-world programming tasks and problem-solving scenarios in lessons.
- Supervise Extended Essays and Internal Assessments, guiding students through planning, development, and evaluation of their work.
- Coordinate VEX Robotics, Coding and Website Design Clubs as part of the ECA programme, where students learn to design, build, and maintain functional websites and simple software projects.

Saint John Plessington Catholic College, Liverpool, UK | Feb 2022 – Jul 2022
Computer Science Teacher (Teaching Practice placement 2)

Responsibilities

- Planned and delivered A Level and GCSE Computer Science lessons, using a range of resources to support clear understanding and steady progress.
- Applied live coding and the PRIMM approach to teaching programming, improving student engagement and confidence in computational thinking.

- Maintained well-paced, purposeful lessons that supported consistent student progress and participation.
- Monitored and recorded student attainment, behaviour, and engagement through regular assessment and classroom observation.
- Led parent–teacher meetings, providing clear, focused feedback on progress and practical next steps for improvement.

Hawarden High School, Hawarden UK | Sep 2021 – Feb 2022
A Level Computer Science & Mathematics Teacher (Teaching practice placement 1)

Responsibilities

- Taught A Level and GCSE Computer Science and Mathematics, maintaining a focused and engaging classroom environment.
- Analysed student performance data to identify learning gaps and inform targeted intervention.
- Implemented structured support strategies that led to measurable improvements in student progress.
- Introduced interactive and visual teaching approaches, increasing student engagement and understanding.
- Designed and used a performance tracking system to monitor progress and support differentiated instruction.
- Planned and delivered lessons that were purposeful, accessible, and aligned with learning objectives.

Thames Valley College, Sagamu, Nigeria | Aug 2015 – Aug 2021
Computer Science & Mathematics Teacher

- Delivered engaging lessons to students in A Level and IGCSE Computer Science and mathematics, and successfully prepared students who had a 100% pass in Mathematics & ICT in the 2019 National Junior secondary school examinations.
- Successfully taught a student at who won a silver medal in the 2018 International Informatics Olympiad?
- Determined lesson structure, subsequently supporting high standard teaching, through engaging lessons that made Python programming appealing to a significant number of IGCSE students.
- Prepared course materials, including annual syllabi, homework assignment frameworks and handouts.

Community Grammar School Ajinapa, Nigeria | Apr 2007 – May 2010
Mathematics and Physics Teacher

Responsibilities

- Taught Mathematics and Physics through both whole-class instruction and targeted one-to-one and small-group support, sustaining student progress.
- Worked with parents, students, and colleagues to implement focused interventions, improving engagement and attainment.
- Maintained high standards of behaviour, creating a calm and purposeful learning environment.
- Coordinated the JETS (Junior Engineers, Technologists and Science) Club, where students built simple electronic circuits and developed practical problem-solving skills.

EDUCATION

University1 PGCE (Secondary Computer Science)
University 2, Bachelor of Science: Computer Science, Second class upper class
University of Benin, Benin City, Nigeria, Bachelor of Science: Electrical and Electronics Engineering - Second class

PROFESSIONAL DEVELOPMENT

- Canadian Teaching license / Ontario College of Teachers Membership approved, 2025
- Programming for Everybody (Getting Started with Python), 2025, - University of Michigan

- Python Data Structures, University of Michigan, 2025
- Applied Machine Learning in Python certificate, 2025 - Michigan University
- VEX Robotics Educator certificate , 2025 – Carnegie Mellon University Robotics Academy USA.
- IBDP Computer Science Tier 2 workshop certificate, 2025 - International Baccalaureate
- Disability Inclusion in Education: Building Systems of Support, 2025 – University of Cape Town
- IBDP Computer Science Tier 2 workshop certificate, 2023 - International Baccalaureate
- Qualified Teacher Status, 2022 - UK, Teaching Regulation Agency
- IELTS Academics (Band 7) - British Council
